

AR 020

Auxiliary evacuation device

The AR020 auxiliary evacuation kit is used to support the evacuation operation when it is not possible to use the knife to cut off the injured person's rope (e.g. the fall was stopped by means of a self-locking device with a steel rope). The AR020 support kit can be used to support evacuation using the MK-II (AR010) device.

ATTENTION!!! The AR020 Auxiliary Evacuation Set is not a fall protection equipment and cannot be used for such purposes.

PARAMETERS

Weight	1.75 kg
Rope length	1,5 m
Min. tensile strength	2 kN
Material	aluminium, galvanized steel
Max. load	200 kg

Static strength no less than	2 kN
MBS minimum breaking strength	4 kN

VARIANTS

ref. no.
