

EN 795/A, CEN/TS 16415

Designed for mounting to trapezoidal sheet metal. It is characterized by an increased static strength.

## SPECIAL FEATURES

Protection for max. 3 users

**INOX**

Made of stainless steel

## PARAMETERS

|                                    |                 |                      |   |
|------------------------------------|-----------------|----------------------|---|
| Material                           | stainless steel | Max. number of users | 3 |
| Static strength                    | 30 kN           |                      |   |
| Bore diameter of the catch point Ø | 45 mm           |                      |   |

## VARIANTS

| ref. no.   | version                                              |
|------------|------------------------------------------------------|
| HLH700 101 | anchor point + fastening kit with sheet metal screws |
| HLH700 102 | anchor point + fastening kit for riveting            |
