-----------------	---------------------------------

APPLICATIONS	Designed for the use of 2 people simultaneously and built to offer a solution in jobs where users are exposed to the risk of falling to different levels.
---------------------	---

REVISIONES	The equipment must be inspected every 12 months by an authorized person or by the manufacturer. The inspections must be noted on the inspection sheet attached to the PPE together with the instruction manual.
-------------------	--

FEATURES

- + Category III PPE.
- + Type B horizontal lifeline, suitable for tasks that require frequent horizontal movement.
- + The equipment is suitable for use by two users at the same time.
- + Made of a 30 mm wide, 20-meter long polyester strap, for a working range of 2 to 20 meters.
- + Includes a very easy-to-carry backpack.
- + Designed and built to temporarily secure an area with a risk of falling from height.
- + Allows the attachment of fall arrest harnesses for users exposed to the risk of falling from height.
- + The end supports where the line is fixed must withstand TWICE THE MAXIMUM TENSION LOAD, depending on the span (see the user manual for more information).
